

MCC has developed a unique and proprietary compressor mount system

Toronto Nov 2, 2015 – Mobile Climate Control (MCC) has developed a unique and proprietary compressor mount system which is a patent pending product in the US, Canada and the EU.

This compressor mount system allows for simple belt tensioning, compressor alignment, and reduced vibration and can be customized for various engine bay layouts and compressors. The major benefits are drastically reduced installation time, reduced belt wear, ease of belt maintenance, and reduced noise and vibration.

“This innovative compressor mount system can be used in any bus with any compressor and results in improved performance and reduced life cycle cost for the bus manufacturer as well as for the bus operator. We believe it will be the industry standard for many years to come” – says Eric Weiss Group VP Product Development.
